9   <title>Colors & Typography</title>
10 </head>
11 <body>
12   <h1 class="center red-text text-lighten-2">Typography</h1>
13   <div class="divider"></div>
14
15   <div class="container">
16     <h3 class="red-text text-lighten-2">Headers</h3>
17     <p>We provide some basic styling on a header tags. In the example, you can see the
18     the 6 header tags' different sizes.
19   </p>
20   <div class="card-panel pink white-text">
21     <h1>Heading One</h1>
22     <h2>Heading Two</h2>
23     <h3>Heading Three</h3>
24     <h4>Heading Four</h4>
25     <h5>Heading Five</h5>
26     <h6>Heading Six</h6>
27   </div>
28
29   <br>
30   <h3 class="red-text text-lighten-2">Blockquotes</h3>
31   <p>Blockquotes are mainly used to give emphasis to a quote or citation. You can also use these for some extra text hierarchy
32   and emphasis.</p>
33   <blockquote>this is an example quotation that uses the blockquote tag.
34   <br>Here is another line to make it look bigger.</blockquote>
35
36   <br>
37   <h3 class="red-text text-lighten-2">Flow Text</h3>
```

```
35   <br>
36   <h3 class="red-text text-lighten-2">Flow Text</h3>
37   <button class="btn pink white-text">Toggle to Flow Text</button>
38   <div class="card-panel">
39     <p class="flow-text">
40       One common flaw we've seen in many frameworks is a lack of support for truly responsive text. While elements on the
41       page resize fluidly, text still resizes on a fixed basis. To ameliorate this problem, for text heavy pages, we've
42       created a class that fluidly scales text size and line-height to optimize readability for the user. Line length stays
43       between 45-80 characters and line height scales to be larger on smaller screens.
44     <br><br>
45     To see Flow Text in action, slowly resize your browser and watch the size of this text body change! Use the button
46     above to toggle off/on flow-text to see the difference!
47   </p>
48 </div>
49
50 <div style="height: 1000px;"></div>
